(b) if so, what have been the achievements of this programme so far; and

THE MINISTER OF STATE IN THE MINISTRY OF SCIENCE AND TECHNOLOGY AND THE MINISTER OF STATE IN THE DEPARTMENTS OF OCEAN DEVELOPMENT, ATOMIC ENERGY, ELECTRONICS AND SPACE (SHRI K. R. NARAYANAN): (a) Yes, Sir.

(b) As a result of the deep seabed exploration programme, India is the first country to be registered as a Pioneer Investor and has been allotted an exclusive mine site for extensive survey and exploration work in the Central Indian Ocean by the Preparaory Commission for the International Seabed Authority (United Nations) under the Convention on the Law of the Sea and the related resolutions.

(c) The site allotted to India as a result of its achievements in the deep seabed exploration programme has rich concentration of polymetallic nodules which are resource materials for commercially important metals like copper, nickel and cobalt. At present, the entire demand of cobalt and nickel is being met through imports and a considerable quantity of copper is also imported. If ultimately it is possible to exploit these resources commercially, it will help the country in its industrialisation and economic development.
